I am a self-educated Python developer. Have experience in writing APIs, testing (unit and integration tests) with GitLab CI\CD, Docker, writing Telegram and Discord bots, and web scrapers.

I have worked with the translation of open-source programs and texts from English to Ukrainian

EDUCATION

- Fourth year of bachelor degree of Computer Engineering at TNTU.
- B2-C1 English (good technical).

WORK EXPERIENCE

- I am currently working as Python Data Engineer at Rework-Space since summer 2022. Worked with writing scripts and APIs, unit and integration testing.
- Worked with the translation of [Files](#) apps, and translated [How HTTPS works](#) to Ukrainian.

MY OPEN SOURCE PROJECTS

- [Python Telegram bot](#) - general purpose Telegram bot. Implements all basic Telegram bot capabilities.
- [Python Discord bot](#) - music, guild management Discord bot, implements all basic Discord bot capabilities.
- [C++ Encryptor](#) - simple program for encryption and decryption used DES algorithm or 3DES in ECB and CBC modes.

TECHNICAL HIGHLIGHTS

- Python3(Django, Flask, FastAPI), SQL(PostgreSQL, SQLite), HTML5, CSS3, JS, general basic knowledge of Java and C++.
- Git, Docker.
- Heroku, GCP.
- Linux, Windows.
